SUMMARY

Bachelor of Computer Science with a strong foundation in Software Development and Quality Assurance. Experienced in languages such as C++, Java, and Python, as well as designing web applications using HTML, CSS, and React. Proven expertise in the full development lifecycle, combining technical programming skills with rigorous testing and analysis to deliver high-quality technological solutions. Passionate about problem-solving and collaborating within multidisciplinary teams to ensure impactful results and the advancement of the technology industry.

SKILLS

Frontend Development

- Vue 3 (Composition API)
- React.js
- Angular
- TypeScript
- JavaScript (ES6+)
- HTML5 & CSS3
- Responsive Design & UI Systems
- Component Design Patterns

Databases

- SQL (relational databases)
- NoSQL (MongoDB / Firebase)

Methodologies & Practices

- Agile / Scrum
- Technical Documentation

Backend Development

- Node.js
- ASP.NET / ASP.NET Core
- RESTful API Development
- C#
- Java

Testing & Quality Assurance

- Playwright (E2E Testing)
- Integration Testing

DevOps & Tools

- Docker
- Git (version control)
- CI/CD basics

Mobile Development

- React Native
-

EXPERIENCE

2025 - 2026

QA Analyst

Code Éxitos

- Streamlined testing processes, boosting team efficiency by 25%.
- Collaborated with cross-functional teams to ensure seamless releases.
- Consistently met tight deadlines while maintaining high-quality standards.
- Conducted thorough regression testing, ensuring stability and performance.
- Designed and executed end-to-end testing strategies to ensure the stability and performance of client-facing applications.
- Collaborated with developers to identify and resolve critical bugs, maintaining high-quality standards throughout the development lifecycle.

2025 - 2026

Software Developer

Code Éxitos

- Designed intuitive UI/UX, resulting in a 20% increase in user satisfaction
- Achieved 99.9% uptime through proactive monitoring and maintenance strategies
- Developed high-performance applications, boosting user engagement by 30%
- Developed and optimized a comprehensive Yard Management System (YMS) to streamline logistics and real-time asset tracking.

- Implemented scalable software modules using modern frameworks, significantly improving operational workflow and data accuracy for a high-profile client.

2024 - 2025

Software Developer Intern

Code Éxitos

- Developed small-scale scripts or modules to automate routine QA tasks.
- Collaborated with senior engineers to understand the software development lifecycle in a professional environment.
- Assisted in the maintenance and optimization of internal computing systems and devices.
- Provided technical support and troubleshooting for software components.

EDUCATION

2020 -2025

Bachelor in Computer Science

Universidad Tecnológica Centroamericana (UNITEC), San Pedro Sula, Honduras

- Member of the computer science engineering association (2022-2024)
- University Tutor in Programming as part of my internship and university scholarship.
- IT department member who worked in computer and device maintenance as part of my internship and university scholarship
- Graduated with a GPA of 3.5

LANGUAGES

English	Highly Proficient	Spanish	Native Speaker
---------	-------------------	---------	----------------

ACHIEVEMENTS

- Developed a Decaf language compiler, implementing each layer from lexical analysis to assembly code generation.
- Created an artificial intelligence model using neural networks to identify fake and real news.
- Designed a graphical interface capable of executing SQL queries on a Firebird database engine.
